PROJECT MANAGEMENT

- Iterative program design, implementation & reporting
- Policy development and navigation
- Meeting design
- Needs assessments

Specializing in the interplay between science, policy and communications

Strategic Earth Consulting specializes in developing effective ways to link science and policy with community outreach and engagement. We help our clients understand, navigate, and succeed in implementing effective science-based, policy driven participatory processes. Our approach is multi-disciplinary, highly collaborative, and focuses on the value of open lines of communication. Our team leverages broad experience working with diverse stakeholders to build solutions and successfully achieve the goals identified by our clients.

Reaching beyond traditional forms of communication and engagement

Many of our projects connect communities with environmental policy and decision-making processes. Our success is based on a deep understanding and value placed on transparent, neutral, and inclusive dialogue. We aim to reach beyond traditional forms of communication and engagement, and focus on establishing a multi- directional dialogue designed to exchange ideas and foster relationship building.

Our core expertise lies in collaborating with and reaching audiences that are typically underrepresented and lack involvement, organization, and/or authority in natural resource management. Through dedication and on-the-ground involvement, we have developed deep-rooted connections with commercial, sport, and recreational fishing industries, California tribes and native communities, and other groups and individuals with strong ties to natural resource access and uses. These unique and important relationships allow our team to anticipate and adapt to relational challenges so, together, we can set a new course from which to build enduring partnerships and collaborations.

Creating a neutral space for the equitable exchange of ideas and information

the power of conversation

Let's start a dialogue

Founder and CEO Kelly Sayce, together with principal Rachelle Fisher and a team of talented associates, brings a deep commitment to supporting diverse voices in natural resource decision making and management. With offices throughout California and satellite locations nationwide, Strategic Earth's network of specialists is well positioned to support your project goals.

Building inclusive outcomes to complex natural resource challenges

Strategic Earth assists our clients across a full continuum of services—from strategic communications planning and stakeholder analysis to successful project implementation. Informed by the needs of each target audience, our team develops and implements communications and engagement strategies that speak to the common goals and priorities of our clients and those audiences they are invested in connecting with. Our expertise in community engagement is strengthened by our scientific and policy training, which allows us to reach across barriers and connect our clients with a diverse range of perspectives and translate a technical dialogue into one that is widely accessible, especially to diverse, less-technical audiences. Strategic Earth's team of consultants apply over 15 years of experience developing and implementing communications and public engagement projects that are based on the value and long-term benefits of relationship building to help our clients develop creative, achievable outcomes.

It's an honor and a privilege

We are grateful for the opportunity to work at the forefront of marine science, policy development, and communications with such clients and partners as:

- Aguarium of the Pacific
- California Department of Fish and Wildlife
- California Ocean Protection Council
- California Ocean Science Trust
- California Sea Grant
- California State Coastal Conservancy
- DeepGreen
- Ecotrust
- Fathom Consulting
- Hawai'i Division of Aquatic Resources
- Humboldt State University

- Kearns & West
- The Nature Conservancy
- Marine Life Protection Act Initiative
- Mid-Atlantic Regional Council on the Ocean
- National Marine Fisheries Service
- Resources Legacy Fund
- Scripps Institution of Oceanography
- UC Berkeley
- UC San Francisco
- UC Santa Barbara

We envision a world where inclusive dialogue is the gateway to responsible use and management of natural resources.
